Education

Year	Degree / Exam	Institute	GPA / Marks
Aug 2023 – Present	B.Tech in Computer Science	Graphic Era Deemed University, Dehradun	7.11 / 10.0
2023	12 th – J.A.C. Board	St. Xavier's Inter College, Ranchi	76.00%
2021	10 th – I.C.S.E	Bishop Westcott Boys' School, Ranchi	81.20%

Projects

CryptX | *React, Node.js, Express.js, Firebase Firestore, JWT, AES-256-CBC*

- Developed and deployed a full-stack multimedia encryption web application supporting images, audio, and video files using **AES-256-CBC** encryption with **PBKDF2** key derivation and random IV per file.
- Engineered secure **REST API** backend with **JWT** authentication, bcrypt password hashing, email OTP verification via Nodemailer, and rate limiting (20 req/15 min) to prevent brute-force attacks.
- Implemented per-user file operation history with filter and delete support via **Firebase Firestore**, and a responsive dark-theme **React** frontend with protected routes and Axios JWT interceptor.

MiniC Compiler | *C, Lexical Analysis, Recursive Descent Parsing, TAC, Code Generation*

- Architected a 5-phase compiler in **C** processing source code through Lexical Analysis, Recursive Descent Parsing, Symbol Table management, Three-Address Code (TAC) generation, and target code output.
- Led a team of 3 as project lead; implemented the Lexer and main compiler pipeline supporting variable declarations, arithmetic expressions, and semantic error detection (undeclared/duplicate variables).

Personal Portfolio Website | *HTML, CSS, JavaScript, GitHub Actions, CI/CD*

- Designed and deployed a fully responsive portfolio website with a dark-themed UI showcasing projects, skills, and resume, achieving cross-browser compatibility across all modern browsers.
- Configured **GitHub Actions** CI/CD pipeline for automated build and deployment, reducing manual deployment effort and ensuring zero-downtime updates.

Technical Skills

Languages: Python, Java, C++, C, JavaScript, HTML, CSS

Frameworks / Libraries: React.js, Node.js, Express.js, Flask, Tailwind CSS, TensorFlow, PyTorch

Databases: MySQL, MongoDB, Firebase Firestore, SQLAlchemy

Tools: Git, GitHub, GitHub Actions, Postman, VS Code, Jupyter Notebook, Google Colab

Concepts: OOP, REST APIs, DSA, OS, DBMS, JWT Authentication, CI/CD, Agile Methodology

Security: AES-256 Encryption, bcrypt, PBKDF2, JWT Authentication, Rate Limiting

Licenses & Certifications

Claude 101 & Claude Code in Action Mar 2026

Anthropic Academy

AWS Knowledge: Cloud Essentials (Badge) Dec 2025

Amazon Web Services (AWS)

AWS AI Practitioner Learning Plan Oct 2025

AWS Skill Builder

Building Generative AI Applications Using Amazon Bedrock Sept 2025

Amazon Web Services (AWS)

AWS – Solutions Architecture Job Simulation Sept 2025
